

# LOGISTICS WITHOUT BORDERS

END-TO-END SUPPLY CHAIN SOLUTIONS ACROSS INTERNATIONAL BORDERS

# REDEFINING CROSS-BORDER SUPPLY CHAINS

Moving supplies and finished goods across the U.S. and Mexico border is a necessity for many companies. But sourcing and manufacturing in Mexico is not without its challenges. Security, customs compliance and border congestion all have the potential to wreak havoc on your supply chain and prevent your shipments from reaching their destinations securely and on time.

With Logistics Without Borders, you can eliminate the challenges inherent in border crossings. And you will benefit from a seamless supply chain across the border and beyond, gaining the complete control and visibility that only a true end-to-end, integrated supply chain can offer.

Logistics Without Borders is the only cross-border solution that combines proven customs brokerage and global forwarding services with the worldwide reach and value-added services of DHL. With DHL, your business gets the freedom to operate efficiently, securely and confidently—anywhere in the world.

# INTEGRATED SOLUTIONS

## MAXIMUM VISIBILITY

### LOGISTICS WITHOUT BORDERS CONNECTS SUPPLIERS, CARRIERS AND END-USERS ON BOTH SIDES OF THE BORDER FOR AN END-TO-END SOLUTION.

For many companies with an international supply chain, multiple vendors and hand-offs come with the territory. And that means more opportunities for shipments to be compromised or delayed. DHL offers a global footprint and extended network on both sides of the border, along with broad expertise in customs brokerage and border crossings. With DHL, you can trade the complexities, uncertainties and costs associated with a fragmented supply chain and opt for the efficiencies and simplicities of a fully integrated solution incorporating best practices at every step.

- Value-added warehousing services
- Reverse logistics

# OPTIMIZE YOUR SUPPLY CHAIN AT THE BORDER AND BEYOND

## MORE PERSPECTIVE.

Unlike other logistics providers that lack our breadth of capabilities and international presence, Logistics Without Borders can look at your supply chain holistically to identify opportunities for new and greater efficiencies that improve the way you do business.

## MORE CHOICE.

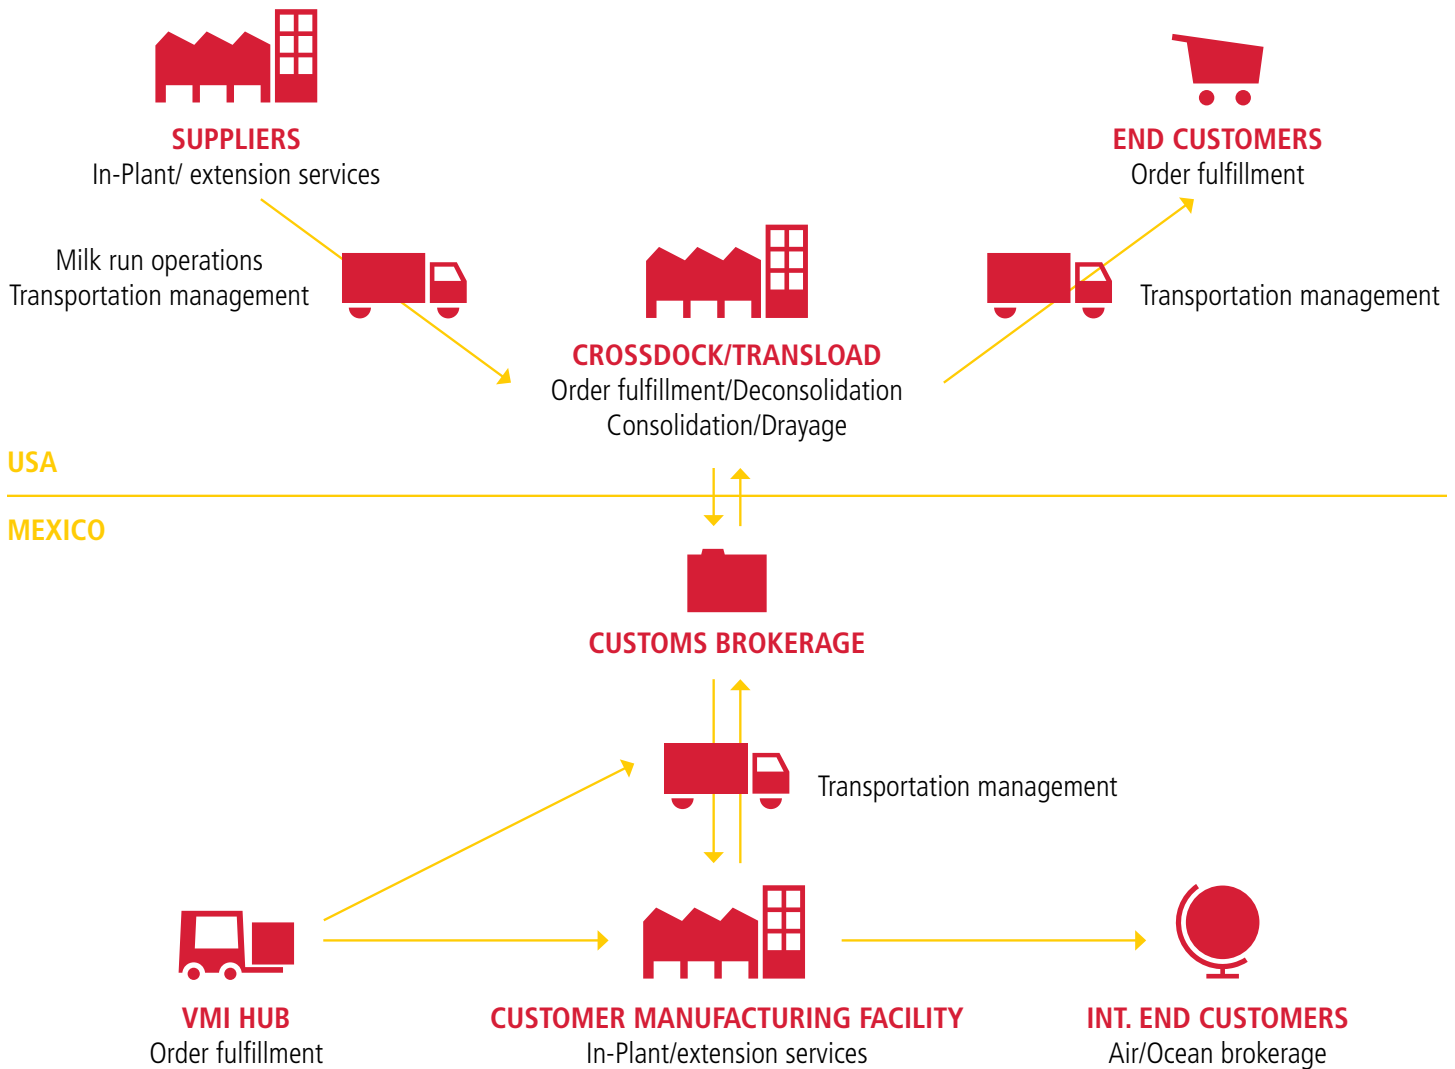

Because we are not tied to specific logistics assets through ownership, we offer the most flexibility to move shipments in the way that works best for you.

## MORE CONTROL.

The Logistics Without Borders network of warehousing, IT and brokerage services offers a single chain of custody that delivers complete visibility of every item in your supply chain, giving you greater shipment reliability. This ensures product security, on-time delivery, smaller safety stock levels with reduced inventory costs and better support for Just in Time and lean manufacturing processes.

## MORE EFFICIENCY.

Whether Logistics Without Borders manages all or a portion of your supply chain solution, we can optimize your supply chain from end-to-end like no other partner can, delivering significant, sustainable bottom-line results for a nimbler, more efficient enterprise.

# FAST, SECURE, RELIABLE BORDER CROSSINGS

Logistics Without Borders seamlessly bridges international borders, keeping your supply chain secure and unified by offering accountability and a single chain of custody.
